

Test 1

- The google solar api did not pickup the main house(green highlighter) only the secondary garage
- The main house was built in 2019 and the secondary garage sometime in the 80's, this could be indicative of inherent problems with using Google Solar API
- The solar model was from 2016 so almost 10 years old

Test 2

- The google solar api did not pickup the roof correctly added the neighbors sheds as part of the property when they are not
- These buildings were built back in the 60's
